AUTO-STAK AS/RS

Auto-Stak

TOP FIVE REASONS TO AUTOMATE

1. Higher Output
2. Increased Productivity
3. Increased Availability
4. Improved Reliability
5. Reduced Inventory Damage

EQUIPMENT FEATURES

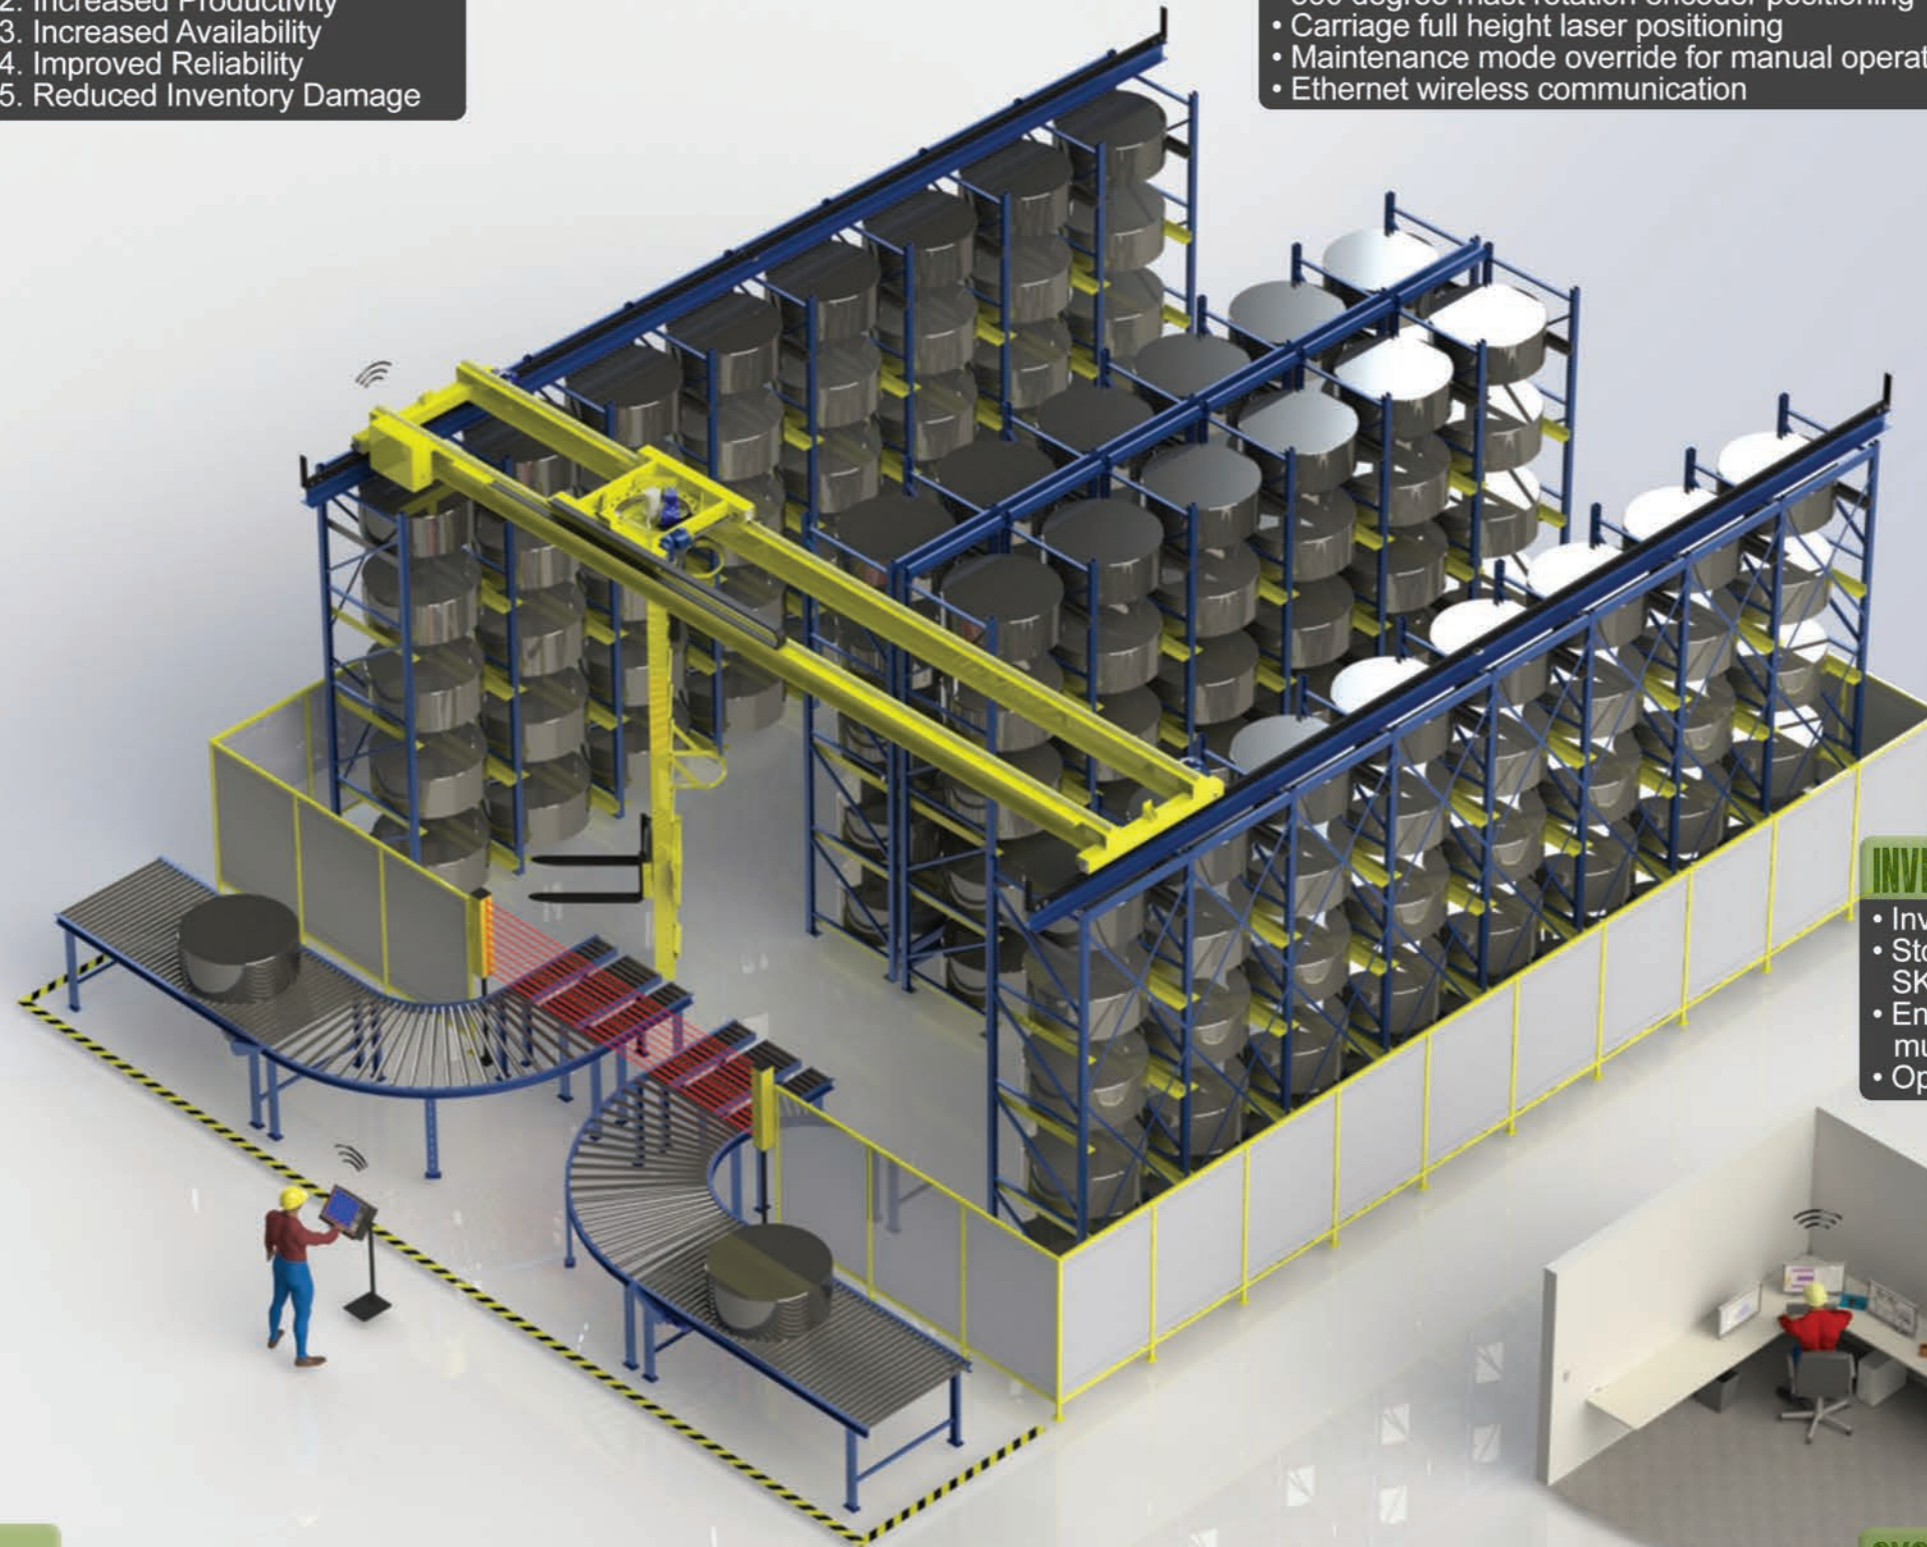

- Bridge and Trolley laser positioning
- 360 degree mast rotation encoder positioning
- Carriage full height laser positioning
- Maintenance mode override for manual operation
- Ethernet wireless communication

Auto-Stak

INTEGRATED EQUIPMENT

- Fencing and interlocked gates
- Protective light curtains
- Visual indicator light trees
- In/Out conveyor feeds
- W.I.P. carts and transfer cars/carts
- Static load and unload stations

INVENTORY CONTROL

- Inventory tracking FIFO/Random
- Store/track product information by SKU, QTY, P/N, or description
- Enter single individual pick commands or multiple commands for batch runs
- Operate/program from offsite or remote location

OPERATOR INTERFACE

- Stand alone operator touch screen console
- Diagnostic and data entry screens
- Permissive tree and visualization screens
- Operation and maintenance mode screens
- Visual and audio alarm screens
- Bar code and matrix code operation

SYSTEM CONFIGURATIONS

- Pre-designed system capacities up to 6,000 lbs.
- Single or double aisle systems serviced with one picker.
- Narrow aisles for increased storage density and a smaller footprint.
